HOW TO CITE THE CHILDREN’S SURGICAL SERVICES:

We encourage you to share these documents with others and we welcome their use as a reference. Please cite each document in the module in keeping with the citation on the table of contents of each of the three documents. If referencing the full module, please cite as:

Child Health BC. *Children’s Surgical Services*. Vancouver, BC: Child Health BC, April 2017.

Child Health BC acknowledges the principle authors, O’Donnell M, Williams J, Skarsgard E, and the contribution of the Surgical Tiers Working Group members: Appleby J, Bhalla M, Blair P, Boardman A, Buonassisi T, Duncan P, Ferguson K, Froese N, Fryer M, Hatcher S, Hayashi A, Johns J, Laukkanen C, Macleod M, Maharaj M, McGeough C, Matthews ML, O’Donnell M, Reimer E, Scrivens S, Skarsgard E, Thain L, Tuff Y, Whelan P, Williams J.

Children's Surgical Services: Setting the Stage for Tiers Development

The Children's Surgical Tiers of Service module is made up of three components:

1. Documents that provide context and were developed to inform the Surgical Tiers module
 - a. *Children's Surgical Services: Setting the Stage for Tiers Development (this document)*
 - b. Summary of the Evidence Volume-Outcome Relationship in Pediatric Surgery¹
2. Children's Surgical Services: Tiers in Brief to Support System Planning (high-level description of the tiers, including responsibilities and requirements)
3. Children's Surgical Services: Tiers in Full to Support Operational Planning (detailed description of the responsibilities and requirements at each tier)

1.0 Providers of Children's Surgical Services

Children's surgical services are provided by surgical and anesthesia providers in partnership with nurses, allied health and other members of the health care team.

In BC, surgical and anesthesia providers have one of the following types of qualifications:

1. Royal College of Physicians and Surgeons of Canada (RCPSC)-certified (see Table 1).
 - a) Adult surgery specialists and anesthesiologists:
 - Surgeons and anesthesiologists who have completed a post-graduate specialty residency program and the relevant RCPSC examination. Residencies are usually five years.
 - Surgical and anesthesiology residency programs include a pediatric component.
 - b) Pediatric surgery and anesthesiology specialists:
 - Specialty-trained surgeons and anesthesiologists who have completed additional training in pediatrics.
 - In Canada, pediatric general surgery is the only pediatric surgical subspecialty recognized by the RCPSC. Pediatric general surgery requires completion of a two-year residency program and the RCPSC examination.
 - Pediatric training for other surgical specialties and for anesthesiology occurs through fellowships which range from one to four years in length. No subspecialty RCPSC examination is required.
2. Family practice physicians with specialty training
 - a) Family practice physicians with enhanced surgical skills:
 - Family practice physicians who have completed a College of Family Physicians of Canada (CFPC) approved one-year training program in enhanced surgical skills or equivalent training in a program outside of Canada acceptable to the College of Physicians and Surgeons of BC (CPSBC) and the governing body of the HA.²

- In 2011, 40 family practice physicians with enhanced surgical skills were practicing in BC; about two-thirds of these were trained outside of Canada.³ These surgeons were distributed across 11 communities in BC.⁴

b) Family practice anesthesia providers:

- Family practice physicians who have completed a CFPC accredited one-year training program in family practice anesthesia or equivalent training in a program outside of Canada acceptable to the CPSBC and the governing body of the HA. Training program should have included specific training in pediatric, obstetrical and adult anesthesia.⁵
- In 2011, 500 – 700 GP-anesthetists were practicing in Canada, mostly in Ontario, the West and the North.⁶ Specific numbers of GP anesthetists in BC were not available.

Table 1: BC RCPSC-Certified Anesthesiology & Surgical Specialists

Surgical Specialty	Pediatric Surgery & Anesthesiology Specialists		Adult Surgery & Anesthesiologists Specialists (see note below)
	BC Children's (Active Members only)	Elsewhere in BC

Urology	3	1 (Kelowna)	97
Total, excl Obs/Gyne	115	25+	1,587 + dentists
Obstetrics/Gynecology	4 Gyne (BCCH)	1 Gyne (Victoria)	259
Total, incl Obs/Gyne	119	26+	1,846 + dentists

Sources:

1. Adult surgery specialists & anesthesiologists: Canadian Medical Association Masterfile, January 2014.
2. Pediatric surgery & anesthesiology specialists: Information provided by Children's Surgical Tiers of Service Working Group.

Definitions:

1. Adult surgery & anesthesiology specialist: Physician certified by the RCPSC in surgical specialty or anesthesiology. Training includes a pediatric component.
2. Pediatric surgery & anesthesiology specialist: Physician certified by the RCPSC in surgical specialty or anesthesiology. Has completed a pediatric fellowship in the relevant specialty. Practice may be mixed adults and children or exclusively with children.

Note: Many adult surgery and adult anesthesiology specialists do not perform surgery/provide anesthesia on children.

2.0 Utilization of Surgical Services by Children

2.1 About the Data

Highlights of the data used to inform the development of this module are provided in this section. Detailed data and a visual representation (map) are available in Appendices 1 - 5.

Data is provided for inpatient (including babies in NICU) and day care service utilization. Unfortunately no comparable provincial-level data exists for hospital outpatient or community-based services.

Data is for 2014/15 and children ages 0 - 16.9 years. Surgical procedures were assigned to the surgical specialty of the procedural physician. For example, if a general surgeon performed a thoracic procedure, the procedure was assigned to general surgery (not thoracic surgery).

2.2 Inpatient and Day Care Visits/Procedures

In 2014/15, 40,771 visits (112 per day, including NICU visits) were made by children to a BC hospital for medical/surgical reasons (19,527 medical and 21,244 surgical visits for a 48%/52% split, based on the most responsible physician (MRP). Of these, 23,659 (65 per day or 58% of total visits) were inpatient visits (78% medical and 22% surgical visits).

27,163 procedures were performed during the 40,771 visits in 2014/15. Of these, 22,613 (83%) were performed by surgeons.

Of the 22,613 procedures performed by surgeons (refer to Tables 2 - 5 for details):

- 16,069 (71%) were performed on a surgical day care basis and 6,544 (29%) on inpatients.
- The highest number were otolaryngology (21% of total visits), followed by dental (21%), orthopedic (15%) and general surgery (12%).
- 10,213 (45% of the total provincial procedures) were performed at Children's & Women's (C&W), 3,808 (17%) in Island Health, 2,994 (13%) in FH, 3,054 (14%) in IH, 1,679 (7%) in NHA and 865 (4%) in VCH.
- The highest number were performed on children living in FHA (36% of the total provincial procedures), followed by children living in Island Health (20% of total procedures) and IH (18% of total procedures). On a per capita basis, the number was lower in FHA/VCH (52% of the total surgical visits vs 63% of the population) than in the other HAs.
- 66% were performed in a hospital in the HA in which the child was residing.
 - Children living in VCH and VIHA were the most likely to access services in their home HA (95% in VCH and 86% in VIHA). Children living in FHA were the least likely (36%).
 - Children requiring otolaryngology services were the most likely to access services in their home HA (84%), followed by gynecology (81%), orthopedic surgery (74%), oral surgery (74%), dentistry (71%) and general surgery (67%).

- Services that children were most likely to travel to another HA to receive were cardiac surgery (76% travelled to another HA) and neurosurgery (73% travelled).
- Expectedly, C&W served the highest percentage of children from another HA (74%). Percentages for other HAs ranged from 2% (Island Health) to 29% (VCH).

Table 2: Surgical Procedures, Children Ages 0 – 16.9 Yrs, by Surgical Specialty (CIHI, 2014/15)

Notes:

1. Surgical procedures were assigned to the surgical specialty of the procedural physician. For example, if a general surgeon performed a thoracic procedure, the procedure would be assigned to general surgery (not thoracic surgery).
2. For the purposes of this table, children from VCH that had a procedure at C&W or a VCH hospital were assumed to have received the service in their home HA.

Of the 108 hospitals in BC:

- Surgery was performed on children in 57/108¹ (53%) hospitals in 2014/15 (CIHI).
- Of the 57 hospitals where surgery was performed on children:
 - 23/57 (40%) performed day care surgery only (defined as 5 or less inpatient procedures per year).
 - 26/57 (46%) performed less than 100 procedures, 28 performed between 100 and 1,000 procedures and 3/57 performed more than 1,000 procedures (BCCH, Victoria General and Surrey Memorial).
 - 22/57 (38%) have dedicated pediatric beds (see Appendix 5 for a listing) and collectively performed 87% of the total pediatric surgical volume.

Appendix 1: ED and Med/Surg Visits and Days by Facility

- Includes children ages 0 - 16.9 years.
- Surgical procedures: Procedures performed on children by a surgeon regardless of most responsible physician (MRP). Includes children in NICUs, PICUs, med/surg units and in day care settings.
- Med/surg visits and days: Visits and days sorted by MRP. Includes children in PICUs, med/surg units and in day care settings (excludes children in NICUs).
- Medical and surgical data is for fiscal year 2014/2015. Source is the BC MoH Discharge Abstract Database.
- Emergency Department (ED) visits: Based on 2015/16 National Ambulatory Care Reporting System (NACRS) data for children ages 0-16.9 for sites that submit to NACRS. Where NACRS data was not available, visits were calculated as 15.48% x total ED visits. 2015/16 MIS data was used for total ED visits.

Appendix 2: Map of Pediatric Surgical Discharges in BC

Appendix 3: Surgical Procedures, Children Ages 0 – 16.9 Yrs, by Treating Hospital

- Includes children ages 0 - 16.9 years. Source is the BC MoH Discharge Abstract Database
- Procedures by procedural physician regardless of most responsible physician (MRP). Includes children in NICUs, PICUs, med/surg units and day care settings.
- Surgical procedures are assigned to the surgical specialty of the procedural physician. For example, if a general surgeon performed a thoracic procedure, the procedure is assigned to general surgery (not thoracic surgery).

Appendix 4: Surgical Procedures, Children Ages 0 – 16.9 Yrs, by HA of Treating Hospital & Child’s Home Residence

- Includes children ages 0 - 16.9 years. Source is the BC MoH Discharge Abstract Database
- Procedures by procedural physician regardless of most responsible physician (MRP). Includes children in NICUs, PICUs, med/surg units and day care settings.
- Surgical procedures are assigned to the surgical specialty of the procedural physician. For example, if a general surgeon performed a thoracic procedure, the procedure is assigned to general surgery (not thoracic surgery).

Source: Survey of health planners & ED working group in each HA and internet.

Note: Several hospitals in BC do not have dedicated pediatric beds but admit children to beds on an adult inpatient unit(s). These hospitals are not included on the list above.

ⁱⁱ Beds have the capacity for invasive monitoring, inotropic drugs and mechanical ventilation.

ⁱⁱⁱ Excludes beds in home-based settings.

^{iv} Includes beds for ages 17 - 24.

^v Plan to increase to 48 beds in the future.

^{vi} Contracted beds and number of beds fluctuates.

^{vii} 14 beds: 5 child, 6 youth & 3 special care beds.

^{viii} 4 beds have the capacity for more intensive monitoring, up to and including continuous cardiorespiratory monitoring.

^{ix} Includes 1 detox bed.

^x Includes 14 beds at Looking Glass (up to age 24), a residential eating disorders program operated by PHSA (BC Mental Health & Substance Use Services and BCCH) in collaboration with the Looking Glass Foundation.
