

Program Objective: To ensure that children at risk for hip displacement receive appropriate screening and are referred to a paediatric orthopaedic surgeon at the appropriate time to minimize or prevent complications associated with hip dislocations.

Milestones since March 31, 2018:

Clinical Milestones

- Continued provincial recruitment with total of 742 children enrolled (35% of expected children with cerebral palsy born 2000-2016).

Knowledge Translation & Communication

- Completed updated therapy mapping in province to determine service providers and gaps in service
- Distributed updated booklets, quick guide, and new posters to all child development centres and school district therapists, including those who have not requested booklets.
- Presented at BC Children's Neuroscience Rounds and Radiology Rounds
- Presented to BC Association for Child Development and Intervention
- Site visit to SHARE Society, New Westminster

Data Management System & Evaluation

- Completion of Hip Surveillance Program Filemaker Pro database with one half of historical data entered to date
- Distributed survey of pediatricians in BC on knowledge and learning needs related to CP; reviewed initial review of results.
- Updated evaluation plan following Provincial Advisory Committee meeting

Province-wide Collaboration & Leadership

- Held full day Advisory Committee meeting in Vancouver with representation from stakeholders from across the province
- Continue to work with colleagues in Edmonton to develop a strategy to enroll and follow children receiving orthopaedic care at Glenrose Rehabilitation Hospital.
- Developing a survey for parents/caregivers to learn about their experience in receiving a diagnosis of CP or other life changing diagnosis together with colleagues from neurology.

Next Steps & Target Dates:

- Completion of data input into database – November 1, 2018
- Update e-learning module and translate booklets to reflect updated 2018 guidelines – October 30, 2018.
- Distribute parent survey – October 1, 2018
- Create knowledge translation plan for pediatricians utilizing pediatrician survey results
