

Child Health BC Provincial Pediatric Sepsis Toolkit Factsheet

BACKGROUND

Sepsis is a leading cause of preventable death and long term morbidity for children globally. Early recognition and management is key to optimizing outcomes. It was identified through the Child Health BC (CHBC) Children's Department (ED) Tiers of Service self-assessments that the implementation of best practice resources to support pediatric sepsis was needed.

Many advancements have since been made including:

- a 6-month trial in 2021 piloting a Provincial Pediatric Sepsis Toolkit in a rural Emergency Department
- the development of a Provincial Pediatric Sepsis Recognition and Management Guideline to improve standard of care across BC
- the development of patient/caregiver resources for sepsis education
- the development of knowledge translation materials to support health authority led implementation

ABOUT THE CHBC PROVINCIAL PEDIATRIC SEPSIS RECOGNITION AND MANAGEMENT GUIDELINE & ACCOMPANYING TOOLKIT

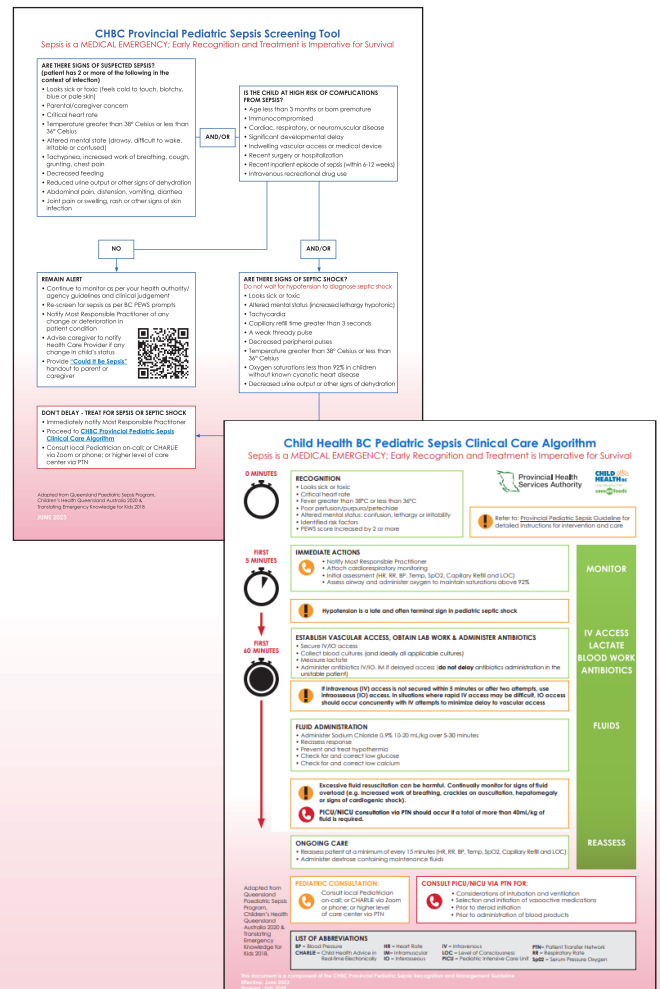

The CHBC Provincial Pediatric Sepsis Recognition and Management Guideline is based on international best practice and incorporates input from a broad range of pediatric clinicians across BC.

Additional resources in the toolkit are:

- an information booklet for parents and caregivers of a child diagnosed with sepsis
- a one page infographic, "Could It Be Sepsis"
- implementation materials

Included in the guideline is:

- a screening tool
- a clinical care algorithm
- fluid resuscitation & antimicrobial guidance
- recommended laboratory and other investigations

PARTNER ENGAGEMENT

The toolkit resources were developed after extensive consultation with the following BC & international partners:

- BC Patient Voices Network
- Center for International Child Health
- CHBC Provincial Pediatric Sepsis Advisory & Working Group
- Hamilton Health Services
- Health Quality BC
- PHSA Health Literacy Language Specialist
- Queensland Paediatric Sepsis Program, Children's Health Queensland Hospital and Health Services
- Sepsis Alliance
- Sepsis Canada
- University of British Columbia Action on Sepsis Research Cluster

HOW TO ACCESS RESOURCES

The CHBC Provincial Pediatric Sepsis Toolkit is available to download from the [Child Health BC Sepsis Toolkit](#) webpage.

KEY DOCUMENTS

- [CHBC Provincial Pediatric Sepsis Recognition and Management Guideline](#)
- [CHBC Provincial Pediatric Sepsis Screening Tool](#)
