

Fact Sheet 4c: Tier Adjustment between Module Self-Assessments

After the development of a new module or after a major update of an existing module, a standardized self-assessment process is utilized with the following objectives:

1. New modules (refer to Fact Sheet 4a):

- a. Identify the tier to which a particular service most closely aligns.
- b. Identify areas of strengths and opportunities for improvement.

2. After a major update¹ of an existing module (refer to Fact Sheet 4b):

- a. Confirm or adjust the tier to which a particular service most closely aligns.
- b. Assess progress on opportunities for improvement identified during the previous self-assessment.
- c. Identify new areas of strengths and opportunities for improvement.

Between self-assessments, changes may occur to a service which may impact the tier alignment of the service at that site (the tier may be increased or decreased). **This Fact Sheet (5c) describes the process for adjusting the tier alignment between self-assessment periods. This process is undertaken when the adjustment is intended to be “long-term” (i.e., more than 12 months).**

If a change occurs which may impact the tier alignment of a service at a given site, the process is as follows:

1. The site identifies a change in the ability of that site to meet one or more of the tier defining criteria which are necessary to align to a specific Tier of Service. The tier defining criteria are identified and validated during the module development process (refer to Fact Sheet 3a).
2. The Executive Lead and Physician Lead of the affected service engage an interdisciplinary team in the completion of the “Request for Tier Adjustment between Module Self-Assessments” form (Appendix 1). Suggested team members include the clinical program manager(s), team leader(s) and front-line staff across impacted care areas.
3. If all tier defining criteria can be met at the newly aligned tier, the form is submitted to the Executive Director/Network Director (both, if applicable) and Medical Director/Network Medical Director responsible for the affected service(s).
4. The Executive Director/Network Director and Medical Director/Network Medical Director review and, if agreeable, confirm the adjustment and inform the Vice-President. Site partners/colleagues are also updated.
5. The Executive Director/Network Director submits the form to Child Health BC (CHBC). CHBC updates the tier alignment in survey and database tool. Relevant documents are updated (e.g., map showing the location of various tiers). Communication is provided to relevant provincial partners once the update is completed. No updated reports are issued.
6. Tier alignment will be reviewed in full at the next scheduled provincial self-assessment (after a major module update).

¹ Major module updates are done every five (5) years, or more often if necessitated by changes in multiple areas of practice.

Fact Sheet 4c: Tier Adjustment between Module Self-Assessments

Appendix 1: Request for Tier Adjustment between Module Self-Assessments

To complete this Form, please refer to the tier defining criteria (in blue type) in the relevant Tiers of Service module.

Site	_____
Service	_____
Current Tier (based on self-assessment undertaken (date) _____)	_____
New Tier	_____
Reason(s) for the change	_____

All tier defining criteria at the new tier have been reviewed and are met. The Vice President has been informed of the change.
